PROFILE

With a solid background of 4+ years in software development, I am an adept software engineer specializing in crafting seamless cross-platform mobile applications and robust server-side solutions. In the Flutter domain, I excel in widget-based UI development, advanced state management, and effective integration with RESTful APIs. On the Golang/NodeJS front, my expertise lies in designing scalable RESTful APIs, implementing secure authentication, and integrating with diverse databases. A problem solver at heart, I thrive on challenges, consistently delivering innovative and user-centric solutions. My collaborative spirit and commitment to continuous learning make me a valuable asset in dynamic and forward-thinking development environments.

EMPLOYMENT HISTORY

Full Stack Developer at BagyerUSH Delivery - Freelancer, Tema, Accra
